

IE-MIT Global SCALE Network

International MBA and Supply Chain Management (Logistics Programs)

Objective

In today's business environment, companies are looking to optimize production and reduce costs while efficiently reaching their customers, driving global supply chain management and logistics to the forefront of business strategy.

In recognition of this development and in alignment with the objective to enable professionals to quickly respond to the challenges of globalization, IE Business School, and the MIT Global SCALE Network have partnered a Dual Degree: International MBA & Supply Chain Management and Logistics program in which participants will have the opportunity to earn both the International MBA degree and one of the following specialized degrees:

- **Master of Engineering in Logistics degree from the Supply Chain Management (SCM)** program at the MIT Center for Transportation & Logistics (MIT CTL¹) in Cambridge, Massachusetts, USA.
- **Master in Logistics and Supply Chain Management (ZLOG)** at the Zaragoza Logistics Center (ZLC²) in Zaragoza, Spain.
- **Master of Science in Supply Chain Management (MSCM)** at the Malaysia Institute for Supply Chain Innovation (MISI³) in Shah Alam, Malaysia.

This dual degree program is intended to prepare professionals for careers that combine general management capabilities with specialized logistics and supply chain management skills.

Admissions Criteria

Students will apply to both schools separately and be evaluated for admission by each based on respective requirements and criteria, including GMAT, GRE or IE Global Admissions Test (ieGAT) as applicable. For administrative identification, applicants for the dual degree program will be requested to indicate their intentions on their applications to both schools so that close consultation between both institutions' admissions offices be facilitated. Please note that tuition scholarships supporting the dual degree program are only available if application and admission to both schools has been processed prior to commencement of either.

Deadlines

IE offers two intakes per year (April & November) and has a rolling admissions process meaning there are no deadlines. On the other hand, MIT/ZLC/MISI centers have one intake per year and review application deadlines in 3 rounds, depending on the institution. Therefore, students applying for the fall intake of the SCM/ZLOG/MSCM should not apply after the previous spring season*. Please note that those seeking financial support are strongly recommended to apply simultaneously to both institutions to ensure funding opportunities.

*Key dates are subject to annual change. Please check the corresponding program website for the most up-to-date information.

Admissions Requirements

Institution	IE Business School	MIT Center for Transportation & Logistics	Zaragoza Logistics Center	Malaysia Institute for Supply Chain Innovation	
Program	International MBA	SCM	ZLOG	MSCM

⁴ Please note that some original documents will be shared between the two institutions.

International MBA

#gobeyond

Dual Degree Structure

Students can start the program in either institution and complete the dual degree in the other. The total duration of the dual degree can vary **from 20 months to 2 years** depending on the combination chosen. Several combinations are possible:

Option 1: If the student joins IE's November intake and then MIT/ZLC/MISI in August, the total duration of this combination would be 20 months minimizing the time the student spends away from the job market. The structure is as follows:

IE Business School International MBA (9 months)	1st period Nov-Feb	2nd period Feb-May	3rd period May-Jul	SCM/ZLOG/MSCM (10 months)
	Business Fundamentals	Core Management	Integration and Implementation	
	1st period Aug-Nov	2nd period Dec-Feb	3rd period Mar-May	

Option 2: If the student joins Business School's April intake and MIT/ZLC/MISI in the following year, students can pursue an internship to fill the gap between the two degrees which is a great opportunity to already gain professional experience in the area in which they will specialize in at MIT/ZLC/MISI. The total duration of this combination is 2 years. The structure looks as follows:

IE Business School International MBA (9 months)	1st period Apr-Jun	2nd period Jul-Sep	3rd period Oct-Dec	Internship or IE Business School Electives & Internship*	SCM/ZLOG/MSCM (10 months)
	Business Fundamentals	Core Management	Integration and Implementation		
	1st period Aug-Nov	2nd period Dec-Feb	3rd period Mar-May		

*The IE Business School electives & internship are optional.

Option 3: If the student joins MIT/ZLC/MISI in August and IE Business School's November intake, the students have the opportunity to pursue an internship to fill the gap between the two degrees and directly apply what they learnt in MIT/ZLC/MISI. The total duration of this combination is 23 months. The structure would be as follows:

SCM / ZLOG / MSCM (10 months)	1st period Aug-Nov	2nd period Dec-Feb	3rd period Mar-May	Internship	IE Business School International MBA (9 months)
	1st period Nov-Feb	2nd period Feb-May	3rd period May-Jul	4th period Sept-Dec*	
	Business Fundamentals	Core Management	Integration and Implementation	Elective Period	

*The 4th period in IE is optional in this case.

IE-MIT Global SCALE Network

International MBA and Supply Chain Management (Logistics Programs)

Fees and Financial aid

The tuition fees for the programs are:

- International MBA € 59,900*
- SCM program \$61,152*
- ZLOG program € 24,000*
- MSCM program MYR 85,000*

Requests for financial aid will be processed separately by each institution and in accordance with the school's policy. In order to request scholarships or financial aid, candidates must have already received a definitive admission prior to the beginning of either program.

* Prices are subject to annual change. Please check the corresponding program websites for the most up-to-date prices
