### ■ Objectives

The Sabanci (E)MBA – ZLOG Dual Degree Program is a particularly appropriate program for students who seek management responsibilities as professionals in manufacturing, distribution, retail, transportation, consulting, software or logistics organizations with a system-wide perspective. The need for professionals with a sophisticated understanding of complex management issues and the ability to design and operate global networks which are constantly in flux is clear. The unique resources available at Sabanci School of Management and Zaragoza Logistics Center provide the perfect setting in which that needed understanding and knowledge may be gained.

### ■ Admissions Criteria

Students apply to each school separately and are evaluated for admission by each based on respective requirements and criteria, including GMAT, GRE or ALES as applicable. For administrative identification, applicants for the dual degree program will be requested to indicate their intentions on their applications to both schools to facilitate close consultation and application material exchange between both institutions' admissions offices.
