Executive Program in Management of Global Health Supply Chains
March 10 - 31, 2012 - Zaragoza Logistics Center, Zaragoza (Spain)

Description:
This intensive three-week program is designed for Global Health Supply Chain (GHSC) managers and professionals supported by national governments and international organizations, in particular those working in-country. Participants will come away being able to:

- Discuss GHSC performance
- Manage inventory and the flow of materials in the GHSC, including determination of appropriate order quantities and stock levels
- Understand GHSC uncertainty and ways to address it
- Identify and understand GHSC operational challenges and opportunities, such as financial, information, transport, procurement and warehousing
- Participate in and influence GHSC redesign and initiatives to improve access.

Faculty:
This executive program will be taught by a combination of experienced faculty members and experts on the field. The course is administered under the MIT-Zaragoza International Logistics Program, a unique research and education partnership between Zaragoza Logistics Center (ZLC) and the Center for Transportation and Logistics at the Massachusetts Institute of Technology (MIT).

Location:
The course will take place at the Zaragoza Logistics Center.

Early Application Deadline:
Early applications should be submitted by December 1. Space is limited. The course fee of €6,000 covers course materials and accommodation. Scholarships will be available for exceptional candidates from low-income countries.
